

Panasonic DMP-BD10AK 1080p Blu-ray Disc Player

If you are looking for a disc player with high definition components, the Panasonic DMP-BD10AK 1080p Blu-ray Disc Player may be for you. This disc player model is the next up in the generation for high definition products that provide quality entertainment. The quality of the images is good along with the features in sound.

In fact, with its modern video technologies and home theater sound, you won't find anything like it. This player also includes HDTV in high performance which provides you with a movie viewing experience like never before. You will actually feel like you are in the movie yourself because of the picture and the sound.

With the Panasonic DMP-BD10AK 1080p Blu-ray Disc Player, it has the components to decode the sound of Dolby True HD. In fact, it is the first Blu-ray disc player to be able to do that. This Dolby sound is a brand new surround sound that doesn't use a lot of compression unlike Dolby Digital components. This sound can still have a sound that has a rich and full quality when you're watching a movie.

This Blu-ray disc player also comes with a 7.1 Channel Audio, Dolby Digital Plus, Dolby Digital DTS-HD and DTS decoding. Along with that there is an advanced pixel processor. On one side of a disc between 25 GB, which is a single layer and 50 GB, which is a dual layer can be stored on the Blue-Ray discs. That can add up to at least 10 times the amount that a DVD can store. With Blu-Ray discs, they can utilize the highest quality HD video that is available today.

Other features include:

- Left and right audio outputs
- Stereo and 7.1 channel audio outputs
- Audio D/A converter

With this Blu-ray disc player, you will be able to enjoy your movies every time you watch. With the surround sound, you would not want anything else.
