

BlackBerry Bold 9700 Phone AT&T

The BlackBerry Bold 9700 Phone can keep you connected to the AT&T network. There are so many things that you can do with it. If you are one that constantly checks their e-mail, you will get notification every time a new one is sent to you. Even though the device is hand held, you can still look at attachments in Adobe PDF, Microsoft Office and Corel Word Perfect.

You can also use this BlackBerry model to surf and browse the internet. The web pages come up in a snap. If you like RSS feeds, you can set it up on this device. Don't forget about the instant message system. With this, you have the BlackBerry Messenger, Google Talk, Yahoo! Messenger and Lotus Sametime.

For business people, there is the enterprise email and messaging. You can have up to eight email accounts for business or personal use. You won't have any problems typing with the 35-key backlit QWERTY keyboard.

The camera has is a 3.2 megapixel along with the following features: image stabilization, auto-focus, flash and 2X digital zoom. There is also a feature for video capture capabilities. Along with that, there is digital audio and video player. You can also play music files from iTunes or Window Media Player.

Bluetooth can also be used with this in the form of stereo music streaming. This BlackBerry model is also set up as a 3G modem to connect to a laptop computer. The phone already has a 2GB card and internal 256 MB memory.

The BlackBerry Bold 9700 phone can keep you organized with a calendar, a to-do list, memo pad and calculator. Even though you may turn off the cell phone portion, you can still listen to music while in "airplane" mode. If you don't want to hold the device, you can use the full duplex speakerphone that enables you to talk hands-free. You can also be hands-free when you use the dialing feature. It is set up for voice activation and no hands needed to dial the number.

This model is just right for those who want to stay connected and don't always have to use their hands.
